Ask HN: Best way to back up online personal data? - morenoh149 Online personal data can be quite easy to lose, especially email. Our email provider shuts down for about a year every decade. It seems like hardware is the best option. Is it possible to just put a hard drive in a box and have it automatically make an archive of everything stored on the drive of every month to an FTP? ===== tptacek First, you can't put your entire email archive in a hard drive and expect the email server to serve you well. You really need to setup something on the server side that can run a rolling archive, so that an archive isn't full of spammy messages from 30 years ago. Second, if you go this route, you want to make sure that you have a backup of the archive (and, given that the archive for a given year might be 10 GB, that's not trivial). Third, you want to make sure that whatever backup method you use actually maintains the files that you care about and not garbage. For example: don't put all of your ssh keys into one text file. Fourth, if you're going to use a backup method where you're constantly restoring data, make sure the restore is your favorite method. Now, people live with make-a-local-archive-of-a-500-GB-archive-and-restore-it-every-month. I'd rather spend my time on exciting things, like learning to track small animals. ---- bjackman You're going to have to learn how to track small animals with or without a hard drive. :) ---- tptacek As someone who's done a (distinguished) job of it, I'll say that they're not actually the most fun hobby. ---- bjackman Not to be a patronizing prick, but what's the actual point of tracking them? What do you do with all of the data you collect? ---- tptacek I

According to wikiturkey, Romanian for "arm of vultures", a bird that looks like a large falcon with the body of a vulture and the neck of a hawk. It is a fictional species in a series of books by Arthur Ransome. The series began in 1924 in the first book Swallows and Amazons. The second book, which continued the story, is Not Alone in the World, published in 1925. The third book, Two with Swallows, is set in the autumn of 1926, after the two children have been living on the island for about a year. The fourth book, a sequel to Two with Swallows, is April Fool's Day in the Spring. The fifth book, the sequel to Not Alone in the World, is called Once Upon a Time in the West. The sixth book, the sequel to that, is The Picts and the Martians. The last two books, in the series, are Little Men (1928) and Winter Holiday (1930). In the books, the children live in an isolated place, most of the time. Eventually the children's father marries a woman called Julia while the children are in the country. They are lonely, until they meet their friends Swallows and Amazons, who live in a house called Tootley Barton. The sets for the films were built at the Headley Grange in Hampshire, England. The maps in Swallows and Amazons (1930) have been criticised for failing to show the course of the Nile. It has also been pointed out that the existence of the red-capped pygmy shrew is unknown to the characters, who might have distinguished it from the house shrew. The film was set in 1925 and Swallows and Amazons was produced in 1927. The film was reviewed in The Times on 8 December 1928. The film Swallows and Amazons (1975) was a critical and financial failure, perhaps due to the absence of the child actors from the first two films. The film, based on a novel by Arthur Ransome, was released 30 years after the first film. The film was criticised for its lack of authentic life to the original novels. The map of the film included a depiction of the first location of the novel, Tootley Barton, built on the site of the fictional house. A scene where the children begin to be able to sail on the lake was filmed 1cb139a0ed
