Have you ever wondered what season a cat is expecting? If you haven't, you're sure to have by the time you've played Seasonspre! Sunny is a quaint little tortoiseshell squirrel who just happens to be time's most adorable animal. When spring finally arrives, she sets off on a festive journey around her animal world, looking to help her friends decide which season they're most looking forward to being a part of. In doing so, Sunny can change the past of each of her friends, getting a few laughs and spurring her chums to new and better decisions. For each friend you help, you'll earn a reward in the form of gifts and season-specific outfits. But you can't just run around on each day helping everyone - that will upset the seasonspre! If you'd rather have some help with that, there's also a limited support system called Sunny's Event Changers. Get yours now while you can! Warranty & Comments How do I play the game? Simple! Just go forward in time and turn around - there's only one platform! It's pretty simple, but I think most people will find this game super rewarding once they can start helping Sunny. Have fun! - Christopher J. Ashley, Development Team Lead How do I report a bug? We would really appreciate it if you let us know about any issues you experience while playing Seasonspre. We'll try to fix any problems as quickly as we can. - Experience Mystery House, an original VR horror story with a completely new sense of immersion. - Solve all the mysteries and escape from the house - A multitude of possibilities to solve each puzzle - Up to date sound design and music, with remastered old horror soundtrack Note: This game is in English only. Our last update for "FOG" was on January 10th, 2016. Since then we have received many requests on the things we could implement in the game. The good news is that we managed to implement a lot of things, let's see what they are now 1. New Weapon The weapon we presented was our first weapon. It was very limited in the sense that it used to be extremely difficult to aim and shoot. Some of the good news is that we managed to implement it now. We named this weapon "Equisorb" and it can also be used as a harmless tool that makes walls or floors transparent. It also shoots a beam when triggered. 2. Cross Camera We implemented a new camera. It lets the player view the world from all directions without being limited to the movement in a given direction like in the last update. 3. More Traps We implemented a lot of traps that were missing in the last update. All that we have done is limited to functionality like dropping a gas bomb, setting off a fire bomb, launching a laser, launching a nail and much more. We hope this is enough to satisfy many people, we have more surprises in mind. 4. Bigger Map We increased the map to 64 square meters, the old one was not big enough. 5. Many more Death Animations Death animations have been doubled in comparison to what we presented before, that is, when you die you will take 5 seconds to reload a room from the last point of where you were. Also, you will hear a short sound just before you die and hear the sound of a gunshot when you die. 6. More Character Models We have made new models for all characters that appeared in "FOG", we made 4 new female character models and 2 new character models for the shop guy, and 2 new character models for the woman in the legend. 7. New Equipment Model We have added a new weapon model and a new model for a new piece of equipment we have received some requests for, "Labels". If you don't know c9d1549cdd
