“Hocus flips every genre right on its head and demands extreme concentration – and some serious puzzling skills.” 80/100 – Game Rant “If you’re looking for a brain-teasing game that really pushes the boundaries of its genre, Hocus is definitely the one for you.” 80/100 – Slide To Play “For the most part, the puzzles and the mechanics are well-built and engaging. The controls and the general flow of the game are spot-on, and it’s a completely unique experience. The presentation is excellent, with a unique art style that does an amazing job of capturing the spacey, Escher vibe. The only reason I don’t give it an 80/100 is the minor amount of time I spent dying to figure out the next puzzle... it’s a simple concept, and it could have packed more of a punch.” 80/100 – Pocket Gamer “Hocus is a very intuitive puzzler that provides not only some nice interactive artwork, but also a challenging experience.” 80/100 – Gamezebo About the developers: Amazing Interactivity is a small games development studio from Portugal, consisting of a handful of talented, game developers. Their focus is in mobile game development. About the Hocus Hocus is a maze-matching puzzle game in which you attempt to clear mazes in a fi... A: I got really into this a few months ago. The process of trying to deal with a live, compromised computer was really interesting. The rest of this answer is stuff I found interesting while trying to debug my Minecraft server. The important, official changes to Minecraft since "Creative Update"

#239 (May 2014) are numbered starting with 239 (which was v1.4). What I did to "solve" the problem of a hacked Minecraft client connected to the server is to have the server tell the client to delete everything and reinstall. A very detailed diagram of this approach can be found here.

This approach has two problems. The first is that it is relatively slow. Once the client sends the delete command, it must generate a list of blocks that need to be deleted, calculate the locations

of all of those, then send the delete command to all of those locations. To get around this problem, I wrote a helper tool which forces the client to calculate where all the blocks are and it does that for you. It then deletes all the blocks for you and asks you where to put the last block to create the block desert. It then asks for every other block again, from the start of Minecraft up until the desired height, and deletes them. Once that is done, all the "dungeons" have been removed and you can restart Minecraft without any trouble. The second problem, of course,

What's new:

I knew that horror could and should be done in a darkly comic manner, but I didn't want to think about this. Because if I did think about it, it would have been too scary. What would that bright future hold for me, if I, by the grossest and heinously unintended chance, were to walk into a future that nonetheless still wound up looking like some horror movie? I suppose if some noble impromptu coalition of the world's greatest moral leaders could have held out to the bitter end, they might have—by sheer will, and a confidence in organized pacifism—awarded me a posthumous Noble Peace Prize for this “world-changing act of pacifism.” But even noble to the next person may be selfish and egotistical, and I can imagine losing my place in the ranks of civilization along with the unlucky stranger who precedes me in this historical-necessity chain of events. Would I compromise my heroics for a serendipitous kid-friendly future? Would I have the gall to say “Nah, no thanks, kid. I'm smarter than that. Also, I'm old and cranky and will likely be dead by the time you get around to it,” thus cutting short my noble, if pointless, gift of peace? Well, I admit that “Noble Peace Prize loser” doesn't sound quite as romantic as “Noble Peace Prize winner,” but I suppose

that, in all cosmic fates, if “Noble Peace Prize loser” is my lot, one can only hope for the best: an epoch after the coming ultra-real (that is, not an April Fools’ joke) Ultra-Horror War that finally merits the Middle Eastern noblemen giving me a peace prize for all Humanity. Here’s our “Muv-Luv War” story. Chapter 1 When I was in college, an aunt of mine, with whom I was unfortunately too emotionally distant to have much in the way of a personal relationship, was more of an “aunt” to us in a way. We couldn’t spend much time together, although we were close enough to let everyone know what we were thought of by phone when she grumpily complained about something. But if you told me that her ability to complete a sentence

The future is dark. The so-called year of 2012 A.D. Will the earth be exterminated by a cataclysmic event? Will what remains of humanity find sanctuary elsewhere? With the majority of mankind gone, the remaining survivors struggle to cling to an existence based on a balance between science and faith. Forty-nine years ago, on April 19, 2036, a mysterious meteor shower flared up, prompting the air force to scramble fighter jets. What they discovered frightened them to the core. The objects were unlike anything they had ever seen before. These objects had red pulses that glowed brightly in the dark night sky. They had various names: "spaceships", "aircraft", "flying saucers". However, the pilot's report stated that these "objects" were beyond description. The pilots lost control of their craft after it approached one of these objects. However, what they saw with their own eyes was too terrifying to convey. ...and the fact that the air force had a tendency to cover up information and had a history of deception and its own paranormal sightings does cause me to be weary of the truth. Forty-nine years later, the newly resurrected director of the air force, Commander Joshua Smith, set out to observe a massive object crash into Earth. With the majority of mankind gone, the remaining survivors struggle to cling to an existence based on a balance between science and faith. June 2014, Lunar Day. After we finish our day at the Lunar Day Festival, Dr. Joshua Smith discovers an anomalous artifact on the night of the 29th. The Director of the Air Force, Commander Smith, takes control of the newly revealed object, intending to collect the data onboard the scope. However, a distress signal from the area of the artifact causes Commander Smith to set out with his team to investigate the cause of the distress signal. However, two days later, at the Lunar Day Festival, Commander Smith suddenly goes missing. This is when the real trouble begins. The Director of the Air Force, Commander Joshua Smith, set out to observe a massive object crash into Earth. Forty-nine years later, the newly resurrected director of the air force, Commander Joshua Smith, set out to observe a massive object crash into Earth. Daniel E. Quinn Daniel Quinn (born August 1, 1946) is an American author, filmmaker, and political theorist. He is the author of a series of New York Times best-sellers, including The Story of B, To Have or to Be, Animals Agenda, The Story of Human Flesh, Our Kind of World, and Wild Blood. At the same time he has been active in political movements for social justice and ecological sustainability. His most controversial views are centered around the issue of human cannibalism, which he affirms has been a taboo subject in most cultures since mythological times. Situational ethics Quinn's positions on just conduct have been strongly influenced by his concern for the ecosystems of the Earth: his ethics are guided by principles of harm avoidance, and by a hope that they will promote the collaboration of human beings with other species. His works combine fiction with a wide variety of theoretical and historical information, advancing a theme which he argues, in line with the views of E
